Programme Learning Outcomes

Upon successful completion of the BCA Programme, students will be able to:

i) Effectively convey technical information through written and verbal communication.

ii) Apply the knowledge acquired from core courses to a diverse range of advanced computer science subjects, enabling independent learning and the development of sophisticated technical solutions.

iii) Utilize critical comprehension, analysis, and synthesis to design, implement, and assess computer-based systems, processes, components, or programs that fulfill specific requirements.

iv) Recognize the practical applications of Computer Science across various fields, enhancing their career opportunities.

v) Acknowledge the necessity for lifelong learning by engaging in continuous education and research activities.

vi) Employ the principles of best practices and standards to create interactive and abstract applications that cater to user needs.

vii) Demonstrate understanding of professional, ethical, legal, security, and societal considerations and obligations within the realm of computer science.
