MODEL COMPETITION ON THE OCCASION OF NATIONAL SCIENCE DAY, 28th February 2023

The National Science Day is celebrated in **India** on **February 28** each year to mark the discovery of the Raman effect by Indian physicist Sir C. V. Raman on 28 February 1928. Such celebrations serve as a good platform for various scientific discussions and lectures.

The National Science Day was also observed in the Department of Physics, Mangaldai College with great enthusiasm and it was good to see that this time a large no of participants turned up to make the event a successful one.

A model competition was arranged among different departments of Mangaldai College. It was good to see that a large number of participants took part in the competition and came up with new ideas and very interesting models having impacts in day to day life. It was a tough job to decide the winners. Based on different criteria a total of 6 groups were declared as winners. Participation certificates were given to all the participants and trophies were given to the winners.

The event was well organized and we got encouraged to hold such events again in future with more participants with new ideas and more such interesting talks.
